

For 65 years, JOE made sure the chickens were fed. Now, thanks to innovative Memory Care technology at Silver Creek, that's one less worry on his mind.

WE'RE REINVENTING MEMORY CARE ONE STORY AT A TIME.

Learning the Life Story™ of each resident is the first thing we do to make sure the care we offer is tailored to fit your loved one's individual needs. We then design daily activities, menus, conversations, reminiscence therapies and all other aspects of care around each person's unique interests and preferences.

For Joe, this included setting up a live feed of the chickens being fed, utilizing Silver Creek's state-of-the-art network system and touch screen technology. One of many details we tend to at Silver Creek to keep our residents feeling safe, secure, engaged and fulfilled with purpose every day.
